These demographic data only represent the geographic areas that contributed data and might differ by populations prioritized within each state or jurisdiction's vaccination phase. Every geographic area has a different racial and ethnic composition, and not all are in the same vaccination phase. These data are thus not generalizable to the entire US population.

Percentages displayed in the charts below represent the percent of people vaccinated for whom the demographic variable of interest is known.

About these  [How Do I Find a COVID-19 Vaccine?](#)

CDC | Data as of: July 30, 2021  
6:00am ET. Posted: Friday, July 30,  
2021 2:11 PM ET

In the figures below, the dark red bars/dark blue bars represent the percentage of all vaccinated people who fall into each demographic group, and the gray bars represent the percentage of all people in the U.S. population who fall into each demographic group. If all groups got vaccinated according to their share of the population, the dark red/dark blue bars would be the same length as the gray bars.

- Instances where the red bar is shorter than the gray bar indicate that the number of people in that group who received at least one shot is

## Footnotes

---

**Timing:** <sup>†</sup>Data will be updated as soon as they are reviewed and verified, often before 8:00 pm ET each day. However, daily updates may take longer if there are any delays in data reporting.

- Data on doses of vaccine administered included data received by CDC as of 6:00 am ET on the day of reporting.
- Vaccination data on the CDC COVID Data Tracker are updated daily (including weekends) between 1:30 pm and 8:00 pm ET.
- Updates will occur the following day when reporting coincides with a federal holiday.
